- PC Games

a smooth user interface and optimizing performance across multiple devices and browsers.
- Collaborated with cross-functional teams, including designers, marketers, and stakeholders, to gather requirements, provide technical guidance, and ensure the timely delivery of project milestones.
- Employed the Agile methodology, specifically Scrum, to plan and execute project tasks in iterative sprints, resulting in increased productivity, improved communication, and faster time-to-market.
- Actively participated in daily stand-up meetings, sprint planning sessions, and retrospective meetings, contributing to a collaborative and efficient development process.
- Optimized the website for search engine visibility, adhering to SEO best practices and improving organic traffic and user engagement.
- Received positive feedback from clients and stakeholders for delivering a high-quality marketing website that effectively showcased the brand and increased lead generation and customer acquisition.

Tkxel	**Jun 2021 - Mar 2023 (1.8 years)**

Software Developer / Software Engineer

Lahore, Pakistan

Roles and Responsibilities:
- I worked on RPA Project in which we automated the procedures for different clients. It was a scrapping and automation project, and it had a lot of clients using the RPA tool which we created.
- I worked on the PDFTron tool to create a signature app on ReactJs, Completed the POC, and worked on the project architecture.
- I Learned Automation and scrapping of the websites by using Nodejs and I completed all the tasks on time and took care of the deadlines.
- I managed my teammate on the RPA project for understanding the project architecture and workflow to get started on the project.

Stack: MERN/MEAN
Backend Technologies: Nodejs, Typescript, Express , SQL, AWS
Frontend Technologies: ReactJs, Typescript, Svelte, tailwind CSS, Angular

AllZone Tech	**Mar 2020 - Jun 2021 (1.3 years)**

Full Stack Developer / MERN / MEAN Stack Developer

Lahore, Pakistan

Roles and Responsibilities:
- I worked on a CMS web application for insurance firms. The Web app has a million users and receives a lot of daily traffic.
- On a daily basis, I managed the team and allocated tasks to the team members, and I used to take scrum at the start of the day.
- I developed the project using excellent coding methods and double-checked them during code reviews.
- I used to do Code reviews on a daily basis and it helped a lot in finding bugs and reduced code complexity.
- Contributed to the NPM package (SQForm) which our team developed for the project.
- Once a week we used to do sprint grooming and decide the task complexity and give a complexity number to the task.
- I always tried to complete the task before the deadline and do proper testing before submitting a pull request.

Tech Stack: JavaScript, ReactJs, React Hooks, Typescript, Nodejs, Typescript, Express JS , SQL, GitHub, BitBucket, AWS , Jira

ONSETS	**Jul 2019 - Feb 2020 (7 months)**

Full Stack Developer / MERN Stack Developer

Lahore, Pakistan

Roles and Responsibilities:
- I worked on eCommerce websites and CMS web applications.
- I completed and delivered the projects on time and we gained good traffic of users on projects.
- I was using the best coding practices and followed the best project structures to centralize the project architecture.
- I was quick in my task completion and I was punctual in my job timings.
- I was using Jira to create tickets and log hours on it. I was following Jira ticket rules to create tickets.
- Once a week we used to do sprint grooming and decide the task complexity and give a complexity number to the task.
- I always tried to complete the task before the deadline and do proper testing before submitting a pull request.

Projects

Scribble

Company: Tkxel

Tools: Svelte, AWS, TailwindCss, Reactjs, PDFTRON, JavaScript, Html5, CSS

- The E-signature project offers a digital solution for signing PDF documents electronically.
- Users can eliminate the need for traditional paper-based signatures, saving time and reducing costs.
- The project enables users to sign and send documents quickly and conveniently.
- It provides a user-friendly interface for uploading PDF documents and adding signatures, text, and date data.
- The project utilizes advanced encryption technology to ensure the security and privacy of signed documents.
- Users can easily navigate the interface and complete the signing process without any hassle.
- The E-signature project streamlines the document signing process and enhances overall efficiency.
- By adopting this project, organizations and individuals can digitize their signature processes and move towards a paperless workflow.

Selectcare CMS

Company: AllZone Tech

Tools: Nodejs, Reactjs, CSS, TailwindCss, Html, JavaScript, AWS

- Selectcare CMS is a healthcare project aimed at efficiently managing user insurance records.
- The system allows users to easily handle their health insurance documents, including claim forms, invoices, and medical records.
- It offers a user-friendly interface to simplify navigation and facilitate tasks like updating personal information.
- Users can submit insurance claims through the system and track the status of their claims.
- The main objective of Selectcare CMS is to provide a comprehensive solution for managing insurance records and eliminate the need for manual record-keeping.
- The system integrates seamlessly with insurance providers to enable automatic updates of insurance plans, co-pays, and deductibles.
- The project aims to streamline the process of managing insurance records, reducing administrative burdens and improving overall efficiency.
- By utilizing Selectcare CMS, users can avoid the hassle of manually organizing and maintaining their insurance records.

Kapra Bazar

Tools: Express.js, React, Node.js, MySQL, Css, Html, JavaScript, Stripe

- Kapra Bazar is an eCommerce app built using the MERN stack (MongoDB, Express.js, React, and Node.js).
- The app specializes in clothing and offers a convenient online shopping experience.
- Users are greeted with easy-to-navigate categories such as men's clothing, women's clothing, shoes, and accessories.
- The app allows users to add products to their virtual shopping cart and proceed to checkout.
- Payment options include cash on delivery or secure payments through Stripe integration.
- The app utilizes an SQL database for efficient data storage and retrieval.
- React is used on the frontend to provide a sleek and user-friendly interface.
- Node.js powers the backend to handle requests, process data, and communicate with the database.
- Kapra Bazar aims to provide a seamless and enjoyable eCommerce experience for users.

BHD

Company: DFX5

https://bhd.com.do/

Tools: AWS, Strapi, Nodejs, Angular, Html, Css

- The website is built using a combination of Strapi, Node.js, Angular, and milesearch.
- Strapi is utilized as a headless CMS (Content Management System) to manage and organize website content efficiently.
- Node.js is used on the backend to handle server-side logic and API integrations.
- Angular is employed on the frontend to create a dynamic and interactive user interface.
- milesearch technology is incorporated to provide enhanced search functionality for users on the website.
- SEO (Search Engine Optimization) techniques are implemented to optimize the website's visibility and ranking in search engine results.
- The combination of these technologies allows BHD to deliver a seamless user experience, efficient content management, powerful search capabilities, and improved search engine visibility.
